

Make Your Own Fabric Softener

<http://thethriftycouple.com/2013/05/02/four-easy-ways-to-make-your-own-fabric-softener/>

Here's what it does:

- Makes the laundry soft and fluffy
- Removes odors
- Removes even more bacteria than just washing alone
- Makes them actually smell good (yes, the vinegar really does this.....)
- And it can also help to lessen the amount of color "bleeding" between fabrics (similar to a Shout Color Catcher)

Make a pre-mixed liquid version for the wash cycle by mixing vinegar with several drops of lavender essential oil and store in a container to use in your washing machine.
